DETAILED ACTION

The last office action is hereby withdrawn in view of Applicant's arguments. However, a new ground of rejection is cited herein based on a further review the IDS submitted in 371 case.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Leong (5,194,581).

The reference discloses a composition useful as prostheses and as therapeutic agent delivery vehicles, comprises a biodegradable, biocompatible class of poly(phosphoesters) which has the general formula (see col. 4, line 6 et seq.) in that if R'=-(CH2)a-, read on the claimed R1 in the claimed formula, n is from about 10 to about 100,000; and R group can be a therapeutic agent, or –NH-R1 in that R1 is nitro, amino,-- (see col. 5, lines 5-17) then the general formula is read on that of the claimed formula.

Application/Control Number: 10/500,565

Art Unit: 1711

Note that the claimed biodegradability can be achieved by varying the functional groups R or R' (See col. 6, lines10-14), which comprises drugs, radioisotopes, immunomodulators, lectins---(see col. 6, line 29 onto col. 8, line 8).

The disclosure of the reference differs from the instant claims in that it does not disclose the claimed characteristics such as water soluble and positively charged---.

However, the reference does disclose the claimed R=-NH-R1 in that R1 is nitro or amino group, corresponding to R3 component in claim 3 whereas R2 is hydrogen; and R' group in the reference is –(CH2)a-, corresponding to the claimed R1 with formula II. In view of this similarity, it would appear to be inherent that the claimed characteristics, water soluble and positively charged biodegradable polyphosphoramidate must be considered inherent in the prior art. See In re Best, 195 USPQ 430, 433 (CCPA 1977).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 571-272-1081. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

Application/Control Number: 10/500,565

Art Unit: 1711

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
